## **DETAILED ACTION**

## Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-9 and 14, are drawn to a general chirp transmission system of a transceiver device (USPC 375/139):

the unique special technical feature of these claims are a system for generating a predetermined chirp signal uses a generic memory unit wherein the specific arrangement and circuits of the transmitter claim, such as I/Q signals, low-pass filters, intermediate frequencies.

Group II, claim(s) 10-13 are drawn to a memory unit in a transceiver (USPC 375/316): the unique special technical feature of these claims are the specific functions and properties of said functions which are stored in the memory and initialization of said memory unit.

Group III, claim(s) 15-24 are drawn to filter units in a transceiver (USPC 375/354): the unique special technical feature of these claims are such that there is a dispersive filter at the receiver end.

Group IV, claim(s) 25-31 are drawn to a data sequences and frequency regulation in a transceiver (USPC 375/316):

the unique special technical feature of these claims are such that transmission of data sequences in bursts contains a preamble consisting of fold pulse, which are used to settle frequency control.

Group V, claim(s) 32-43 are drawn to a receiver in a transceiver (USPC 375/139): the unique special technical feature of these claims are the specific receiver circuits used to receive and process said transmitted chirp signals.

2. The inventions listed as Groups I through V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group I, claim(s) 1-9 and 14, are drawn to a the general chirp transmission system of a transceiver device: the unique special technical feature of these claims are a system for generating a predetermined chirp signal uses a

generic memory unit wherein the specific arrangement and circuits of the transmitter claim, such as I/Q signals, low-pass filters, intermediate frequencies. Group II, claim(s) 10-13 are drawn to a memory unit in a transceiver: the unique special technical feature of these claims are the specific functions and properties of said functions which are stored in the memory and initialization of said memory unit. Group III, claim(s) 15-24 are drawn to filter units in a transceiver: the unique special technical feature of these claims are such that there is a dispersive filter at the receiver end. Group IV, claim(s) 25-31 are drawn to a data sequences and frequency regulation in a transceiver: the unique special technical feature of these claims are such that transmission of data sequences in bursts contains a preamble consisting of fold pulse, which are used to settle frequency control. Group V, claim(s) 32-43 are drawn to a receiver in a transceiver: the unique special technical feature of these claims are the specific receiver circuits used to receive and process said transmitted chirp signals.

3. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

## Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to JAMES M. PEREZ whose telephone number is (571)270-3231. The examiner can normally be reached on Monday through Friday: 9am to 5pm EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Shuwang Liu can be reached on 571-272-3036. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
